GAZ-SYSTEM provides additional solutions allowing customers to take full advantage of market opportunities and meet their obligations under EU regulations.

In operation for more than 10 years, the GSA Platform is a tool for booking natural gas transmission system capacity and contracting secondary market services. The Platform allows gas TSOs managing interconnection points to offer their capacities by means of auctions.

The platform offers transmission system users a simple and transparent tool for capacity booking on primary and secondary market. It also provides LNG terminal users with possibility to offer contracted services on secondary market.

REMIT Reports

Gas Inside Information Platform (GIIP) has been operating for over 5 years and offers a service for publishing inside information related to electricity or natural gas markets (the so-called "REMIT* inside information").

The disclosure of REMIT inside information may affect the wholesale price of electricity and natural gas.

gasinsideinformationplatform.pl administrator@giip.pl

What sets us apart?

Versatility – our platform serves both electricity and natural gas markets

Transparency – the published inside information is accessible to all GIIP users at the same time

Compliance – we publish inside information in compliance with REMIT* regulation and ACER** requirements

*REMIT – Regulation (EU) No 1227/2011 of the European Parliament and of the Council of 25 October 2011 on wholesale energy market integrity and transparency as amended

** ACER – European Union Agency for the Cooperation of Energy Regulators
